

NCBI Bookshelf

Free online access to books and documents in life science and healthcare

What is Bookshelf?

- Bookshelf is a searchable collection of full-text online textbooks, reference books, technical reports, systematic reviews, guidelines, documents, and monographs in the life sciences, biomedicine, and healthcare.
- Bookshelf is an archive to preserve content for continued public access and does not publish content itself.
- There are over **10,500** titles available!

Who should submit to Bookshelf?

Authors consist of a wide range of professionals, including:

- Medical faculty
- Biology departments
- Nursing schools
- Open Education Resources coordinators at libraries
- More traditional publishers of medical guidelines, reference books, and monographs

Bookshelf Benefits

Discoverable

Submitters to Bookshelf will have materials that are web-discoverable

Findable

Can be viewed throughout the world, allowing for the sharing of content and ideas

MARC Record for Item

Materials will have a MARC record, for ease of import into other catalogs

Worldwide Dissemination

We have over 20-25 million visitors a month

Calling all authors! Bookshelf relies on people like you to deposit materials. Get started with the [Submission Guide](#) today!
