

**P.2.7.11 Amyloid Beta 1-42/p-tau 181**

Studies	Design	Total N	Sens (95%CI)	Spec (95%CI)	Measure	Summary of findings (95%CI)	Risk of bias	Inconsistency	Indirectness	Imprecision	Other considerations	Quality
<b>PRIMARY CARE</b>												
2 studies (Gabelle 2012 (Lille); Gabelle 2012 (Montpellier))	2 × prospective	1,200	0.83 (0.78, 0.87)	0.83 (0.79, 0.86)	LR+	4.74 (3.67, 6.12)	Serious	Not serious	Not serious	Not serious	-	MODERATE
					LR-	0.21 (0.15, 0.28)	Serious	Serious	Not serious	Not serious		LOW
<b>Notes on risk of bias</b> Gabelle 2012: Test thresholds were not pre-specified, but optimised based on the data; it was unclear whether the study enrolled random or consecutive people or avoided inappropriate exclusions. A subgroup analysis was carried out but as < 10% population was excluded the study was not downgraded for this. <b>Additional notes:</b> the Gabelle study had 2 independent data sets from 2 different clinics.
