<p>Notes on risk of bias Ossenkoppele 2013: It is unclear whether a consecutive or random sample of patients was enrolled and whether inappropriate exclusions were avoided; the index test was interpreted with knowledge of the reference diagnosis.</p> <p>Notes on indirectness Panegyres 2009: The study only recruited people with early onset dementia (<65 years old). Ossenkoppele 2013: It is unclear whether the LeARN cohort consisted of people with suspected cognitive impairment.</p>
