

Title & Abstract Level 2

1. What type of study is this citation?

- Primary study / Can't tell
- Systematic Review / Meta Analysis
- Guideline/ Recommendation (stop)
- None of the above (specify & stop) : _____

2. Is the population diagnosed as Major Depressive Disorder (MDD), Dysthymia, or Subsyndromal Depression?

- Yes
- No (stop)
- Can't tell

3. Does the study population include subjects who have failed to respond to treatment previously (if the only treatment they receive is rTMS, or ECT please answer No and go onto Q4)?

- Yes / Can't tell (stop-include)
- No (continue)

Instruction for Q3

We are interested in **ANY** articles with this group as the population or subpopulation—common terms to identify this population are:

· Treatment resistant, inadequate response, failed treatment, refractory depression

Sometimes they identify this population by the treatment commonly received after failure—common terms include:

· Augment/augmentation, switching, optimizing, changing dose,

Also respond "yes" to studies that focus on predictors of response rather than treatment efficacy / effectiveness

4. Does this study focus primarily on the following:

- Efficacy / effectiveness of an SSRI (monotherapy)
- Efficacy / effectiveness of a COMBINED treatment
- Efficacy / effectiveness of a NON-pharmacological treatment (monotherapy)
- Adverse events related to medications
- Other (specify in box intervention or population) : _____
- Efficacy / effectiveness of Non-SSRI drug intervention

This is a relevant guideline for this SR. Extract the data:

- Yes : _____
- No : _____
